-Looks hideous

-No tutorial and poor directions

-Poorly translated

-Game Breaks. Stupid but fun one hour.. Stupid but fun one hour.. Only used to get the badge. This game is... okay at best.

This game has some minor flaws in it that make me not like the game as much as I want to.

(e.g. You cannot replay previous weeks [levels] in the game)

Also I do not like how the game does not tell you how to play.

It took me about 2 mins to realize that I had to use arrow keys, 5 mins to figure out what keys do what, and about 10 mins to figure out what I was supposed to be doing.

I stopped at the third week because I just got really bored playing the game. That's not something that should happen when you play a game!

In conclusion, I would not recommend paying money for this. (Unless you are like me and got a steam coupon for the game and used it for the trading cards.)

---

Absolutely worthless trash. I got this for \$0.11 cents after a 90% off coupon and am going to refund it because it's so horrible and most importantly, it's not even a game - It's a fake game.

Like most fake games, this is mobile trash that was ported to steam with no care or thought or skill whatsoever. This game is such a sad pathetic piece of garbage that the so called "developer" somehow removed their name from Steam entirely so you don't even know who "made" it.

The fact that this piece of garbage has a Mixed rating makes me think that the fake developer who "created" this is paying people for fake positive reviews. The actual rating should read "OVERWHELMINGLY NEGATIVE" because any other rating is overwhelmingly untrue.

Video of this terrible garbage

[This is the first time I've ever refunded a thing that cost 11 cents, and after I get those 11 cents back I will throw them into the sewer because that is a better use of money than giving it to whoever "created" this horrible piece of worthless garbage.. I personally don't like this at all, you just press two buttons over and over. The only reason I have this much time in it is because I want all the achievements, but keep falling asleep.. [This is what appealed to me when I decided to pick up this game, and let me tell you, I never looked back.](#)

#### [Pros & Cons](#)

[Pros: Addictive Gameplay, Sleek UI and Design, AI straight from F.E.A.R, fun and interesting characters, unique art styles, pulls at my heart strings, Cool losing mechanics, I enjoyed restarting levels over and over. And many many more](#)

[Cons: the Game wasn't priced high enough.](#)

[Summary: A Game I just couldn't put down, spent countless hours in the campaign mode. Still a relic I visted from time to time. I think everyone in the world should at least play one campaign in this.. \*\*Graphics 3/10\*\*](#)

[Graphics on this game are ok for a game i got for 30c.](#)

[Gameplay 1/10](#)

[Gameplay? what game play? this game is unplayable the tutorial you get is well, there is no tutorial you end up getting chucked into the game and start to button mash hoping something works. There is no way to know what artical to approve this game just screams money grabber.](#)

[Music 1/10](#)

[Music is terrible low quality and could probably make a nicer song by recording my butt after a spicy curry.. Certainly not a sim or management game. In fact it's Just a clicker game at best, a puzzle game at worst, and is rather non-sensical without any instructions. Don't be fooled in to thinking this is worth any small payment - it's not.. The most rediculous game EVER](#)

[My 10 cents just go for the cards](#)
